An Introduction to

Urmia

Urmia is the capital city of West Azerbaijan province in the northwest of Iran. It has a population of about 800,000 people, which is the tenth most populous city in Iran and the second most populous one in the northwestern region of Iran. Urmia is located at an altitude of 1332 meters above sea level in the west of Urmia Lake. Urmia is known as the city with the first modern hospital, the first medical education center, the first modern school, the first local TV channel and the first local publication in Iran.

 Distance to the Turkish border: 50 km

 Distance to the Iraqi border: 140 km

Year of Establishment: 1964

Urmia University

Overview

▼ Research Centers

- Urmia Lake Research Institute
- Nanotechnology Research Center
- Artemia and Aquaculture Research Center
- Biotechnology Research Center
- Microelectronics Research Center
- Social Studies Research Institute

Academic staff

Assistant Professors	220 ⁺
Associate Professors	180 ⁺
Professors	100 ⁺
Total	500 ⁺

▼ Faculties

- Faculty of Agriculture
- Faculty of Engineering
- Faculty of Sciences
- Faculty of Literature and Humanities
- Faculty of Veterinary Medicine
- Faculty of Economics and Management
- Faculty of Electrical and Computer Engineering and Advanced Technologies
- Faculty of Chemistry
- Faculty of Natural Resources
- Faculty of Architecture and Urban Planning
- Faculty of Sport Sciences

Distance to the city airport: 20 km

Distance to the city terminal: 15 km

Distance to the main railroad station: 35 km

Physical Space area

286000 square meter

Total Premises

505 hectares

Majors/Fields of the Study

Faculty of Engineering

Facilities of Faculty of Engineering

● Mechanical Engineering Department Laboratories:

Strength of Materials, Thermodynamics, Dynamics and Vibrations, Materials Science, Heat transfer, Wind tunnel Metal forming, Internal combustion engines, Micro/Nano Electromechanics, Measurement and Energy Measurement, Renewable Energy, and 3 workshops including: Welding and Sheet Metal Working, Machine tools, Auto-Mechanic.

● Civil Engineering Department Laboratories:

Hydraulics and fluids, Concrete technology and building materials, Soil Mechanics, Seismic geotechnical research, Environmental Geotechnical Research, Structure Research, Research center for crisis management and infrastructure engineering, Mapping workshop.

● Mining Engineering Department Laboratories:

Rock mechanics, Mining, mineralogy, Petrology, Cartography, Crushing, Physical separation, Flotation, Hydrometallurgy.

● Industrial Engineering Department Laboratories:

Optimization of systems

Material Engineering Department Laboratories:

Casting and solidification workshop, Forming, Powder metallurgy, Corrosion and Surface Engineering, Metallography and Microscope, Heat Treatment, Mechanical properties, Crying and freezing

● Polymer Engineering Department Laboratories:

Advanced polymers – polymer engineering chemistry

● Chemical Engineering Department Laboratories:

Chemical Engineering Operations, Chemical Engineering Process Control, Chemical Engineering (Fuel Cell, Catalyst and Reactor), Separation processes, Chemical engineering Software workshop.
